

Patient Information:

Name	RAVI
DOB	22-12-1997
Gender	Male
Patient ID	75W191UI

Tumor Prediction: Meningioma Tumor

Confidence Score: 89.87000274658203%

Tumor Description:

Meningiomas arise from the meninges. Though often benign, they can press on brain tissue, causing headaches.

Clinical Recommendations:

Seek neurosurgical evaluation. Observation or surgical removal may be required based on size and symptoms.
